Customize
Appearance

- In the keyboard options menu, you'll find an "Options" or "Settings" button. Click on it to open the customization options.
- Under the "Appearance" section, you can make visual adjustments to the keyboard:

Key Size

You can increase or decrease the size of the keys to make them more comfortable to use.

Font

Choose a font style that you find easy to read.
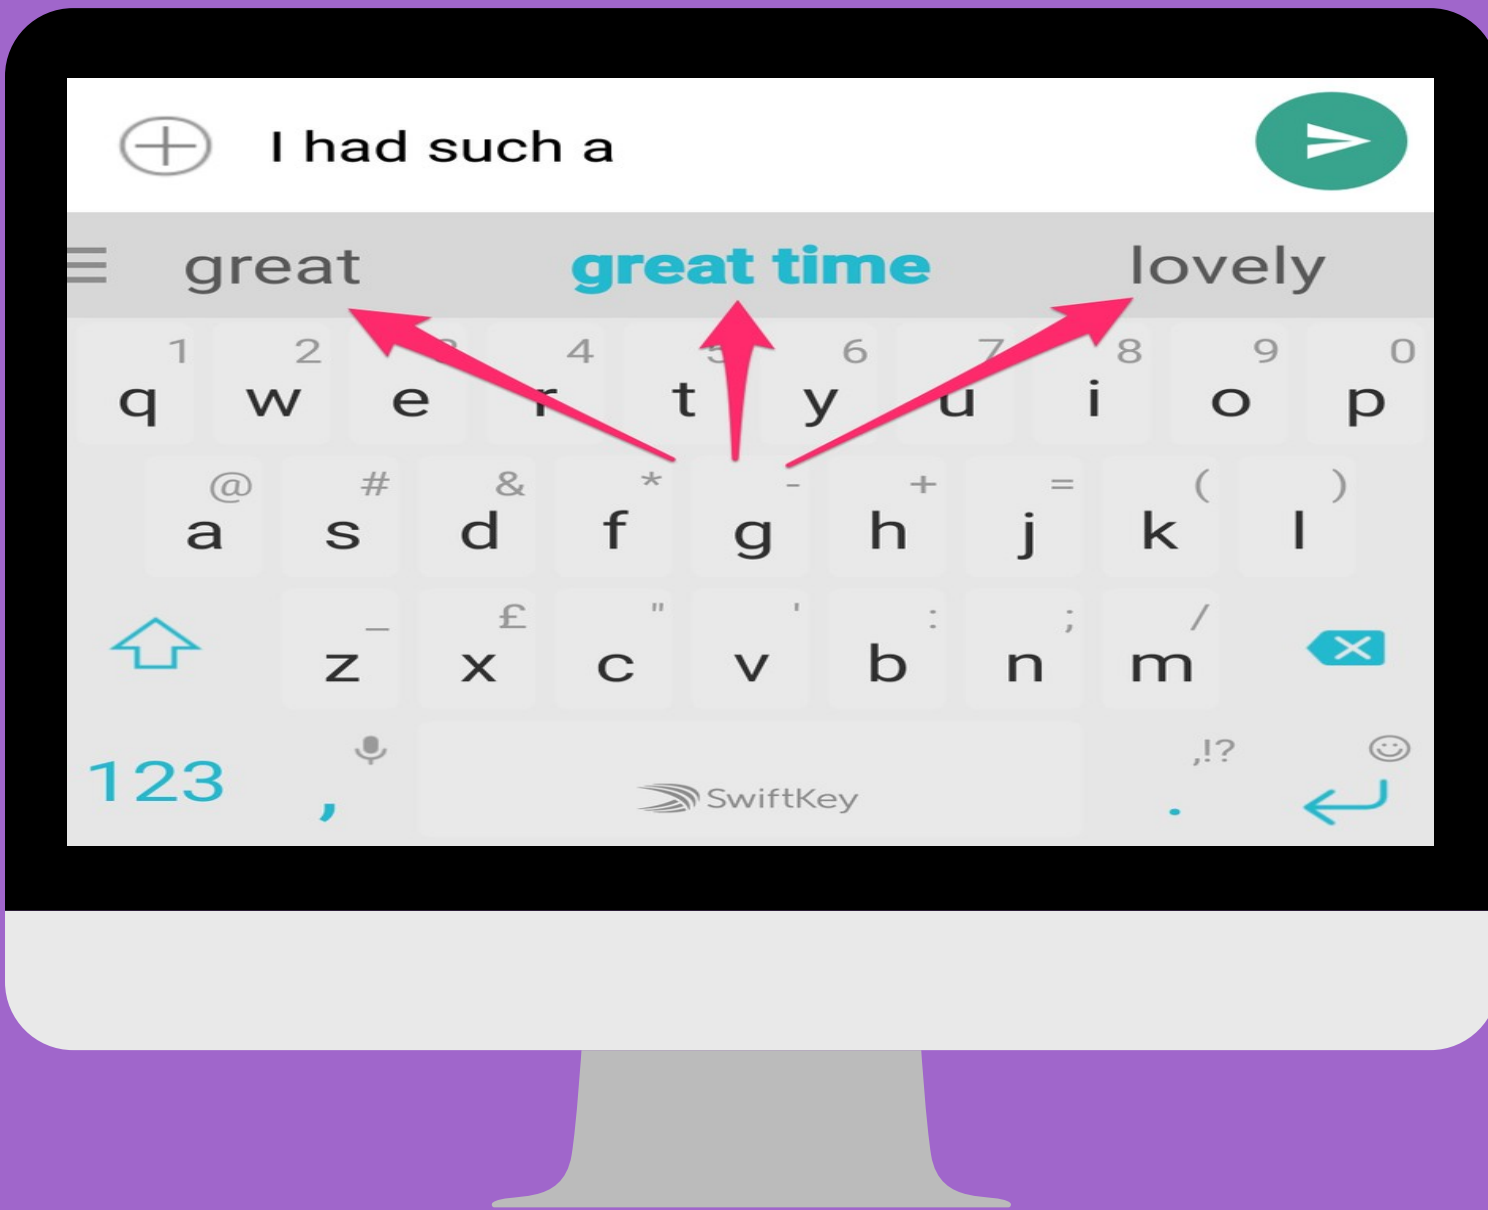

Key Colors

Customize the colors of the keys to your liking.

Enable Word Prediction

In the "Text Prediction" section, you have the option to enable "Show text prediction as I type." Enabling this feature provides word predictions as you type, which can improve your typing speed.

Customize Scanning Mode (if needed)

If you use the on-screen keyboard with a scanning mode (commonly used by individuals with mobility challenges), you can tailor scanning settings in the "Scanning" section. Adjust scanning speed and other preferences to match your needs.

How to Rotate Laptop Screen: Simple And Easy Ways

Add Additional Keyboards (optional)

If you need to switch between different keyboard layouts, such as QWERTY and AZERTY, you can do so by clicking on the "Keyboard" dropdown menu and selecting the layout you prefer. This can be particularly useful if you use multiple languages or have specific layout requirements.

Dock the On-Screen Keyboard (optional)

To make the on-screen keyboard more accessible, you can choose to dock it to the bottom or top of your screen. Use the "Dock" option in the "View" menu to select your preferred location.

Save Settings

After you've customized the on-screen keyboard according to your preferences, click the "OK" or "Apply" button within the options menu to save your changes.

Close the On-Screen Keyboard

You can now close the on-screen keyboard if you're done customizing it. Your settings will be retained for the next time you use the on-screen keyboard.

Okay, so, we have Known customized the On-Screen Keyboard
